B2 - Score: 840/990 (August 2025/2027)

Education

-  Computer and Network Engineering
SMK Tunas Harapan Pati
2022 - 2026
-  Applied Data Science
Electronic Engineering Polytechnic Institute of Surabaya
2026 - Present

Experiences

-  Internship - IT Technician
CV. Putra Mandiri Komputer
Dec 01 2025 - Apr 18 2026 (~5 months)
 - Managed end-to-end IT operations: PC assembly, Windows installation, hardware repair, and network troubleshooting.
 - Resolved hardware/software issues, configured systems/drivers, and supported daily technical infrastructure.
 - Standardized OS installations by removing bloatware and optimizing drivers, improving boot performance and stability.
-  Coding Extracurricular Instructor
Al Azhar Islamic School Pati
July 30 2025 - Apr 22 2026 (~8 months)
 - Teach elementary and middle school students programming fundamentals using Python, web technologies (HTML/CSS), and Scratch(.mit.edu).
 - Design interactive coding lessons, templates, and hands-on assignments focused on programming logic and problem-solving.
-  Dinners Ready — Technical Game Dev
Live2Dev GameJam 2026
July 18 2025 - July 20 2026 (~48 hours)
 - Developed Dinners Ready, a pixel-art psychological horror game in Unity during an Indie Games Group Indonesia jam.
 - Implemented audio systems (SFX/soundtracks) and managed game assets within Unity.
 - Contributed to game architecture, scene organization, and narrative world-building under tight deadlines.
-  2nd Winner — GENETIC 2025 UI/UX Competition
TUNAS - Agricultural Digital Solution
Feb 14 2025 - June 2 2025 (~4 months)
 - Designed an agricultural digital solution focused on seamless, user-friendly experiences for farmers and distributors.
 - Conducted end-to-end UI/UX planning, user research, wireframing, visual design, and interactive feature structuring in Figma.
 - Delivered high-fidelity interactive prototypes optimized for accessibility and clear visual hierarchy.
-  TECHNODAY 2026 UI/UX Competition
Remilque - Food Waste & AI Recipe Recommendation
August 15 2025 - June 2 2025 (~4 months)
 - Designed an interactive waste management application featuring gamification and AI-based waste identification.
 - Developed user flows, eco-friendly visual themes, and reward system mechanisms to drive user engagement.
 - Built responsive mobile interface components focused on intuitive navigation and behavioral nudge design.

-  Independent Tech Team - Frontend Developer
Titik Sempang Creative
May 08 2025 - Present
 - Collaborated with a small team to design and deploy full-stack web applications.
 - Built responsive frontend interfaces and backend services using modern frameworks, APIs, and databases.
 - Managed the complete development cycle from concept to deployment, optimizing application architecture.
-  Web Developer
Church Inventory System Project
Jan 24 2026 - Apr 16 2026 (~3 months)
 - Built a portable inventory system using Laravel 10, PHP 8.4, and SQLite, deployed via Laragon Portable for zero-config setup.
 - Optimized performance with Dual-Version Storage (thumbnails/full preview), reducing load times on low-spec hardware.
 - Created automated deployment scripts (.bat) for seamless installation by non-technical users.
-  Treasurer & Automation Administrator
Community Youth Savings
Aug 24 2025 - Feb 12 2026 (~5 months)
 - Digitized a weekly community savings system by transitioning from paper-based records to a structured spreadsheet-based financial system.
 - Developed spreadsheet scripts and automated reports to track outstanding payments and maintain payment history.
-  TECHCOMFEST 2026 UI/UX Competition
Ecolang - Waste Management & Recycling Rewards
Oct 25, 2025 - Dec 13, 2025 (~2 months)
 - Designed an interactive waste management application featuring gamification and AI-based waste identification.
 - Developed user flows, eco-friendly visual themes, and reward system mechanisms to drive user engagement.
 - Built responsive mobile interface components focused on intuitive navigation and behavioral nudge design.
-  THE ACE 2025 UI/UX Competition
Jobin - Location Based Daily Worker Platform
Feb 14 2025 - June 2 2025 (~4 months)
 - Developed location-based job platform interface concepts and user flows tailored for daily and blue-collar workers.
 - Prioritized high accessibility, clear action buttons, and low visual friction for fast job matching on mobile devices.
 - Conducted usability testing variations to ensure intuitive task navigation and straightforward application tracking.
